Digital transformation

Ai transformation

0

Industria 4.0

- La digitalizzazione e del manifatturiero prende piede

1

Disponibilità di Dati

- In molti casi i dati sono disponibili, sono stati raccolti, ma rimangono lì.

2

Analisi dei dati

- Si fanno delle analisi dati basate su machine learning o altri strumenti

3

Dati Attivi

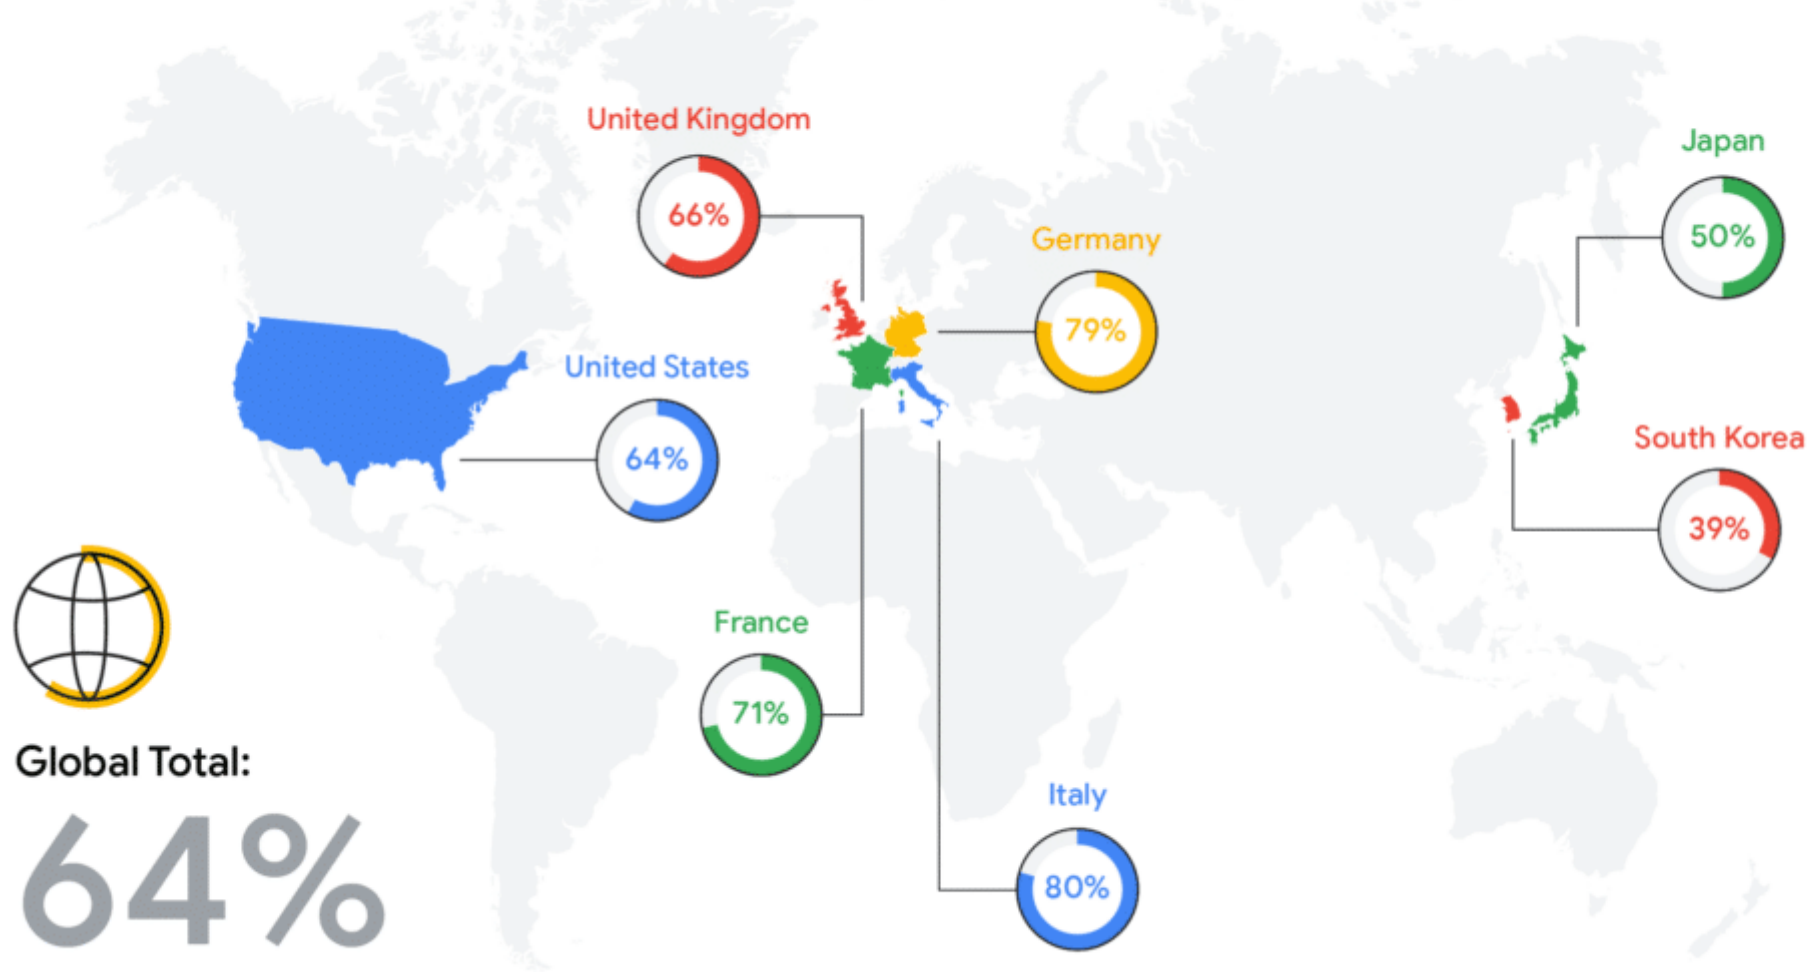

- I dati possono dare luogo a sistemi di intelligenza

4

Dati utilizzabili

- I dati decidono da soli come agire sui processi

AI use in day-to-day operations by country:

Global Total:

64%

Fonte Google Cloud

Top three

manufacturing sub-sectors deploying AI to assist in day-to-day operations:

Automotive/OEMs

Automotive suppliers

Heavy machinery

Some of the barriers for AI implementation in a manufacturer's core business:

Not having the talent to properly leverage AI

Not having the IT infrastructure to implement AI

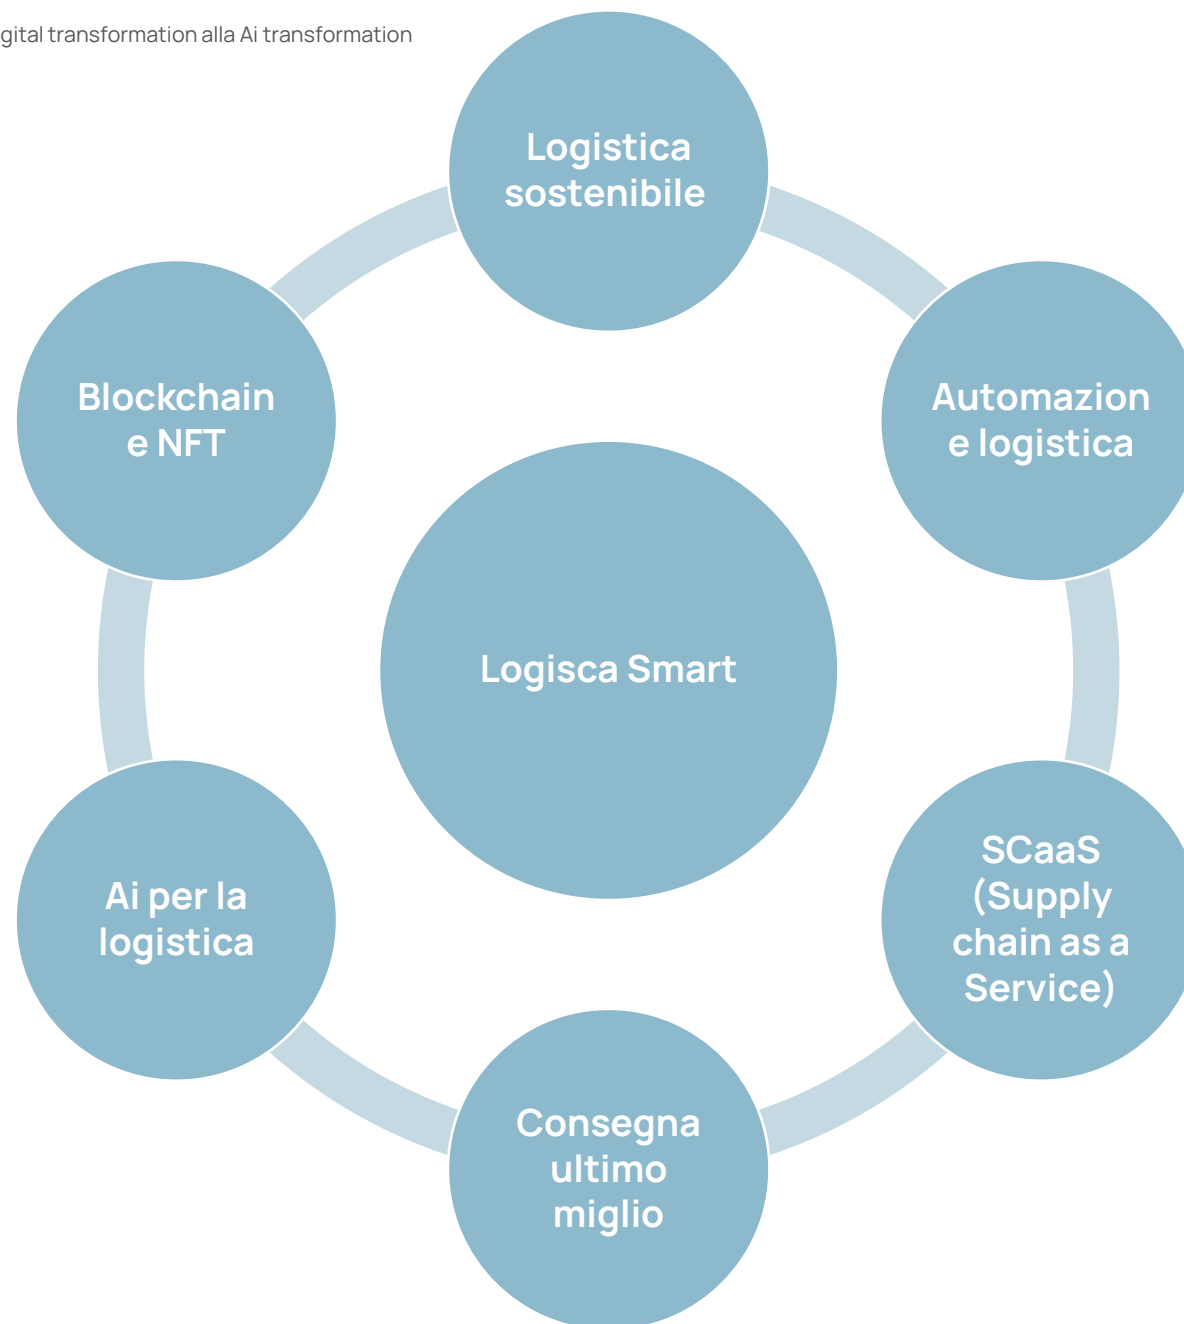

Implementing AI is too cost-prohibitive

AI is unproven technology

Not having stakeholder buy-in to implement AI

Grazie per l'attenzione
